

Forum Worlds of Labour China and Germany

A concept for a program

By Peter Franke, German Asia Foundation

General aims

Mutual understanding and exchange on *Worlds of Labour* in China and Germany

- how they appear, function,
- are controlled and changed,
- have international impact,
- generate forms of representation
- eventually permit a sustainable quality of life for the people

The situation

- Capitalist mode of production is predominant in all countries.
- Labour reserves for capital has doubled and rose from 1.5 to 3 billion worldwide since the end of the cold war .
- The ratio between capital and labour has fallen and led to relative reduction of the price for labour and to a growth of capital profits.
- Readjustments of the capitalist world market after “opening” of China with its population of 1.3 bill.

International cooperations

- Business
- Institutionalised politics
- Academic and cultural institutions
- Worlds of labour disconnected

What are Worlds of Labour?

Labour:

- Creative or productive activities
- Activity to secure material reproduction of humane society

Worlds :

- geographic places/regions/countries
- historically grown cultural, social and economic entities

Grassroots & Cross border

- **Grassroots** approach will focus on (local) experiences and perspectives of self-organisation and empowerment, social movement and transformation
- **Cross border global context** approach repels national chauvinist ideas and agendas, while accepting and respecting different views

Objectives of the Forum

- bring closer the spatially separated worlds
- make socio-cultural commonalities and differences conscious and comprehensible
- uncover and demystify economic processes that cross geographic borders
- relate to each other the actual conditions of capitalist wage labour
- exchange steps to counter its repressive character and overcome it eventually

Social actors, target groups and methodology

- People in China and Germany who are involved in comparable worlds of labour i.e. of same TNCs, industries, production chain, sectors
- Social and labour activists within and outside of formal institutions
- Personal encounter and debate between those concerned and involved people and activists

Programm Framework

- Continuous information and knowledge exchange and publication
- Encounters to exchange experiences and knowledge as well as for cooperation
- Research, analysis and theory building

Consortium Organisations

- Asia Monitor Resources Centre (AMRC)
- Globalization Monitor (GM)
- Labournet Germany
- Transnational Information Exchange (TIE)
- Labour monthly *express*
- Südwind Institut
- Werkstatt Ökonomie (WOEK)
- German Asia Foundation

Implementation: Information and knowledge exchange/publication

- Continuous exchange of original documents, i.e. translating from Chinese to German and German to Chinese
- Documentation of conferences, workshops and visits
- Films/video on social issues with respective language subtitles

Implementation: **Encounter conferences, workshops and visits**

- Explorative visits to China 2005-07
- Conferences on *Globalisation, industrial conflicts and social partnership* (2008) and *Capitalism in Crisis* (2009)

Plans 2009/2010:

- Workshops on garments supply chain, organizing and OSH
- Conference on grassroots perspective of labour rights

Implementation: **Research, analysis and theory building**

- Monitoring post MFA textile/garment industry and supply chain
- Further issues for research and debate:
 - German trade union policy towards China
 - German TNCs in China
 - Chinese TNCs in Germany
 - History of labour movements
 - Culture and social movements
 - Visions of alternatives to capitalism

Thank you for your
attention.

Organisational structure

Consortium China-Germany

Responsible group China

Coordinator: GM

Task pillars

A. Info- and knowledge exchange
(internet/publications)

C. Research, Analysis and Theory
building

B. Encounters for exchange of
experiences, knowledge and
cooperation

Responsible group Germany:

Coordinator: Asienstiftung

task pillars:

A. Info- and knowledge exchange
(internet/publications),
